INTRODUCTION OF AL HAJIRY

MECHANICAL ENGINEERING DIVISION

Al Hajiry Trading LLC started out as a modest steel fabrication facility in 1994 in the Wadi Kabir area of Muscat.

Al Hajiry Trading has now become a well-known and valuable partner when providing mechanical services and products to the oil, gas and petrochemical industries. Drilling contractors and Oilfield service companies have benefitted from Al Hajiry's experience in building specialised products for their services.

We manufacture for Drilling and Oilfield services operations:

- Mobile accommodation units and rig site offices
- Mud systems including installation of mud cleaning and degassing equipment.
- Electrical installations to zone specification.
- Pipe bins of various designs
- Catwalks, fixed and foldable units including pipe racks.
- Complete substructures or modification work
- Refurbishing of drilling rigs, well pulling hoists and brine filtration units.
- Crude oil storage tanks with filtration units.
- High-pressure pipe work for Koomey units.
- Fabrication of mud labs.
- Skid-mounted diesel and water tanks.

For Chemical and Industrial Plants:

- Pipe supports
- Platforms and ladders for columns and vessels
- Pressure vessels
- Silos and hoppers
- Workshop shed elements and their erection.
- Blasting and coating services.
- Large storage tanks
- Process pipe installation.

OUR MISSION

To provide the best products available

To offer these products at the most competitive prices

To offer the best service possible

NEW FABRICATION UNITS

Al Hajiry Trading LLC now has two major fabrication plants in Wadi Kabir Muscat and Sohar Industrial Estate and has plans to open up a third fabrication unit in Nizwa, especially to serve the oil industry.

Each unit will have a covered area of some 2,500 square meters and 25,000 square meters of lay-down and fabrication yard with the latest machinery and equipment including:

- Automatic blasting and airless gun painting
- 20mm rolling machine
- 2x10 tons overhead cranes
- Shearing machine up to 12mm
- Hydraulic press brake of 300 tons
- Angle section rolling machine
- Plasma cutting machines
- TIG, MIG welding
- Flux-cored arc welding machine
- Inner shield arc welding
- Stick arc welding machine
- Submerged arc welding machine
- Mobile crane of 30 tons

SOHAR WORKSHOP

A fully enclosed shop with state-of-the-art machinery and tools, is capable of handling large structural works as well as pressure vessels.

With our commitment to provide quality products, the shop facility is approved by ASME for pressure vessel construction requiring 'U' and 'S' stamps. We shall therefore be able to manufacture pressure vessels in accordance with ASME, Sec 1 and pressure piping in accordance with ASME B31.1

We will also get approval for use of the 'R' stamp for repair and alteration of pressure retaining equipment by the National Board of Boilers & Pressure Vessel Inspectors in accordance with NBIC ANSI/NB-23.

MUD TANKS

We can fabricate complete mud systems from 950 bbls to 4500 bbls with full mud handling, cleaning and degassing facilities installed, based on the requirements like

mud weight and flow rate. Tank bodies are made of V-shaped corrugated sheet designed to carry the maximum mud weight required.

DEGASSERS

FRAC TANK

Poor Boy degasser 48", capable of processing 1.5 M3/min highly gas cut mud. Designed and installed in accordance with EP 89-1500, as per PDO specifications.

STORAGE TANKS

- Tanks of various designs, rectangular, circular, double skin, insulated, skid mounted or mobile units.
- Frac Tanks for oil field use fitted with rear axle for easy transport.
- API Storage Tanks up to 20,000 BBLs capacity.

MOBILE CAMPS

We offer turnkey mobile camps for the oil and gas and construction sectors. Our camps are all built to PDO specifications for use in a desert environment.

All Al Hajiry camps are engineered for durability, comfort and practicality. With our own in-house carpentry, plumbing and electrical facilities, we can provide excellent after sale service if the customer requires camp modifications or repairs.

Some of the equipment we offer:

- 1-2-4-8 sleeper unit
- Mobile rig site offices
- Mobile units for well-pulling hoists
- Complete ready-to-go kitchen units
- Office and recreational units
- Diesel storage tanks
- Potable water storage tanks
- Complete sewage pipe installation
- Sewage holding tanks
- Diesel generator housings
- Complete electrical installation

HEALTH SAFETY ENVIRONMENT

Health and safety: Health and safety form an important aspect of our business perspective. We strive to ensure that all our operations are perfectly safe for our employees as well as our immediate environment and local community. We have fostered a culture in our organisation where health and safety forms the basis of all work. This is led by a dedicated and pro-active management who maintain the highest levels of visibility in our workplace.

As is the case with the construction industry, hazards are part of the deal but what sets us apart is the manner in which the workforce is able to determine the root cause and find the most practical solution.

Environment: We recognise that our activities have the potential to affect the environment and we work with our clients to eliminate the potential for any environmental damage. We also recognize our role in promoting environmental responsibility in our operations and with all those involved in our operations. Our advanced blasting and painting facility in Sohar, enclosed with special exhaust and recycling system is testimony to our environmental commitment.

QUALITY

Al Hajiry Trading is built on the philosophy that it can't exist without quality. This quality is reflected in customer satisfaction and that we are market leaders for our products and services. We believe that the customer is the focal point of the supply chain and hence it is imperative that we provide them with quality products and services.

We have implemented a quality management system which meets the requirements of ISO 9001:2000 and is certified by **Bureau Veritas Quality International** for compliance with the standards. The team at AHT makes every effort to ensure compliance with the QMS requirements and this is verified by periodic internal auditing, identification of non-conformities, root-cause analysis and corrective and preventive action and management reviews.
